Diplomates of the American Board of Internal Medicine in Gastroenterology

September 15, 2009

Dear Presbyterian Health Plan Member:

As of December 1, 2009, Southwest Gastroenterology will no longer be contracted to provide services for Presbyterian insured patients. Presbyterian will have all its gastroenterology services provided through the Presbyterian Medical Group GI Section. You may wish to speak with your primary care physician about selecting a provider from that group. When the time comes and with your written permission, we will then forward records to the provider you select. If there are active issues requiring immediate follow up, we will include a brief letter to that effect. Those patients who have future follow up, such as surveillance colonoscopy, already entered into our medical records system may still receive a letter prompting follow up, though this would take place through PMG GI services. While we regret that after so many years of caring for patients within the Presbyterian system this care is now disrupted, we are confident that the Presbyterian team will provide you high quality consultation and follow up as needed.

Sincerely,

Physicians of Southwest Gastroenterology
